

SOCIAL MEDIA SEO

How to Optimise Social Media for Google, AI Overviews & Search Visibility

Why your social profiles matter more than ever
in search.

What is Social Media SEO?

04

Optimising your social profiles and content so they appear in:

- ✓ Google Search
- ✓ Social platform search results
- ✓ AI-generated answers

Your social presence helps improve **discoverability and trust** across all search experiences.

Why It Matters Now

AI Overviews are changing how people find information. A strong social presence helps search engines and AI systems understand:

- ✓ Who you are
- ✓ What you do
- ✓ Why your brand is trustworthy

Optimise Your Social Profiles

Make sure every profile includes:

- Consistent brand name
- Clear business description
- Relevant keywords
- Updated website link
- Professional branding

Consistency strengthens your entity signals.

Create Search-Friendly Content

Publish content that answers real questions. Focus on:

- Educational posts
- Industry insights
- Helpful explanations
- Audience pain points

Content that helps people is more likely to be discovered.

Be Consistent Across Platforms

Keep these aligned everywhere you appear online:

- Business name
- Profile descriptions
- Contact information
- Website links

This helps search engines **connect all your brand assets** into one trusted entity.

Build Brand Authority

006

Active social profiles strengthen:

- ✓ Brand recognition
- ✓ Trust signals
- ✓ Online visibility

The stronger your authority, the easier it becomes for **search engines and AI systems to reference your brand.**

Social Media + Search = Better Visibility

Social media is no longer separate from SEO.

Your profiles, content, and engagement all contribute to how your brand appears across **search experiences**.

- Profiles build entity recognition
- Content signals expertise and relevance
- Engagement amplifies discoverability
